

SonicPoints Project Management Platform

Overview

SonicPoints is an online project management platform where users can manage projects, complete tasks, earn reward points, and redeem them for items. It helps teams organize their work digitally with gamified productivity features.

Key Features

- Create and manage multiple projects
- Assign and track tasks across statuses (Backlog, In Progress, Review, Completed)
- Earn reward points by completing tasks
- Leaderboard to see top contributors
- Redeem earned points for project-specific rewards
- JWT-based secure login and authentication
- Role-based access (Admin, Manager, Checker, Member)

Examples

- WorkManagement Page: Drag-and-drop Kanban board for project tasks
- AdminPanel: Admin dashboard to manage shop items, tasks, users, and view KPIs
- Redeem Page: Allows users to exchange earned points for rewards
- Leaderboard Page: Displays top-performing users based on task completions and points

Pros

- Gamification (rewards, points) makes task completion more engaging
- Role-based permissions ensure proper control over tasks and rewards
- Progress and KPI tracking encourage accountability
- Project-specific shops and leaderboards keep users motivated

Cons

- Must be logged in to interact with any project (strict authentication)
- If not updated regularly, project status may show outdated progress
- Points system needs careful balancing to stay fair across projects

Lessons for Future Improvements

- Add progress badges and achievement levels (Bronze, Silver, Gold)
- Allow project-specific announcements (example: new rewards, deadlines)
- Improve task notification system (email/push alerts for due dates)
